Data Scientist

Responsibilities:

- Analyze large datasets to extract actionable insights

- Develop and implement machine learning models

- Communicate findings to stakeholders

Requirements:

- 3+ years experience in data science

- Proficiency in Python, SQL, and statistical analysis

- Experience with machine learning frameworks (Scikit-learn, TensorFlow)

- Strong knowledge of data visualization tools

- Master's degree in Computer Science or related field

Machine Learning Engineer

Responsibilities:

- Design and implement ML systems in production

- Optimize models for performance and scalability

- Collaborate with data scientists and engineers

Requirements:

- 5+ years software engineering experience

- Expertise in Python and ML frameworks (PyTorch, TensorFlow)

- Experience with cloud platforms (AWS, GCP)

- Knowledge of MLOps practices

- Bachelor's degree in Computer Science
